eyeCare+ Savings Plan Frequently Asked Questions

Why are you no longer in network with my current vision plan?

Unfortunately, we are unable to negotiate fair & reasonable compensation from some vision plans for our products & services. The reimbursements we receive from some vision plans have not increased (and in many cases have gone down) over the last 10 years. Imagine not getting a pay raise for a decade!

Why am I being offered an eyeCare+ savings plan?

The eyeCare+ discount plans are being offered exclusively to patients of Progressive Eye Center. The plans are an ethical, simple and helpful way to lower the cost of eye care for patients without compromising on the quality and service you deserve. It's important to remember eyeCare+ plans are NOT insurance.

Can I combine an eyeCare+ vision saving plan with my current vision plan?

YES, if Progressive Eye Center is out of network with your current vision plan then the benefits can be combined.

How do I use my out-of-network vision plan at Progressive Eye Center?

(1) We will apply your eyeCare+ benefits (if you enroll) at the time of your exam &/or purchase(s).
(2) You will pay us directly for the products & services you purchase.
(3) We will provide you with a form to submit to your current vision plan. When you send in this form along with a paid receipt to your current vision plan they will send you money directly.
Unfortunately, we can't predict the amount you will receive as sums vary widely depending on your coverage details (which we do not have access to).

Is my eyeCare+ coverage automatically renewed?

No. You will be given the option to re-enroll and/or change your plan each year.

What if I have a medical diagnosis?

If the reason for your eye exam is because of a medical problem (such as diabetes, glaucoma, dry eye disease, high risk medication use, cataracts, etc) you may choose to submit your exam and any additional tests or procedures to your medical plan first. Your eyeCare+ exam benefit of \$120 would then be applied to any remaining balance on the eye exam fees not covered by your medical plan. Your eyeCare+ exam benefits DO NOT apply towards the cost of additional tests and procedures.

When can I enroll in an eyeCare+ Discount Plan?

You can enroll at your exam date or any time during the year. Benefits expire at your next eye exam date or one year, whichever comes first.

Can I use my benefits to purchase additional frames and lenses during my plan year?

Yes. Depending on your plan, benefits are available on additional frames, lenses and single box contact lens purchases until your plan year expires or you re-enroll in a plan. Some frame exclusions may apply, including Maui Jim and WileyX brands.
